

## Public Benefit Policy

<b>Policy Section:</b> Public Benefit	<b>Policy Number:</b> PB-01	<b>Approved By:</b> Council
<b>Regular Council Policy Review Frequency:</b> Every 4 years	<b>Date Approved:</b> June 7, 2018	<b>Date Reviewed/Revised:</b>

### Our Vision for Public Benefit

The public can expect safe, high quality registered nursing practice.

More specifically, the College of Registered Nurses of Manitoba (CRNM) exists for the following public benefit:

#### Strategic Outcome 1

##### **Public Confidence in Excellent Regulation**

The Public can expect and understand that CRNM sets the conditions for registered nurses to practice safely, professionally, and with integrity in all domains of practice. The public can rely on fair, transparent, timely, effective and objective regulatory processes.

#### Strategic Outcome 2

##### **Accountable, Quality Professional Practice**

Ethical, competent, and accountable registered nurses practice safely, effectively, and collaboratively, consistent with the Standards of Practice, Practice Expectations, and Code of Ethics. They actively participate in continuous quality improvement that aligns with their scope of practice and builds continuing competence.

#### Strategic Outcome 3

##### **Collaboration for Health System Impact**

Collaborative working relationships within the regulatory and the health care sectors are advanced to build effective regulation, public safety, and quality care for the public. The government and stakeholders have compelling evidence from CRNM to inform policy decisions.
