CCP Review Outcomes

I am participating in the CCP review. When will I receive my results?

CCP Review outcomes are emailed out to participating registrants in February.

What are the possible results of the review?

There are four possible results following the review of your learning plan:

1. **Exemplary:** This result means your learning plan met all requirements and has excellent flow, presentation and/or innovative qualities. We may ask if we can include your learning plan as an example on our website.
2. **Met:** This result means your learning plan demonstrated planned learning and integration of learning into your practice. Your plan also scored “yes” for all three questions in the scoring rubric.
3. **Met with Recommendation:** This result means you met the program’s goal of engaging in learning to enhance your practice, but your learning plan still has room for improvement. Make sure you use any feedback we send to improve your future self-development planning.
4. **Not Met:** This result means your learning plan did not provide sufficient evidence that you completed a self-directed learning activity to enhance your practice by Dec. 1. If you receive this result, you will be required to complete a CCP learning activity of your choice (e.g. webinar, info session or feedback from the College). You will then have an opportunity to demonstrate how your learning plan meets the program requirements by submitting information from your learning plan for the current year with the online renewal.
