Registered Nurses
of Manitoba

Leave of Absence Renewal Options

If you are taking a leave of absence (maternity, sick, disability, etc.) you have two options when it comes to renewal. No choice is more right than the other; it's up to you to read the following information and decide which option is best for you.

Option A - Renew your Certificate of Practice

Renew as you normally would during the renewal period. Once your complete application has been submitted and approved, this option allows you to return to practice as an RN anytime between Jan. 1 and Dec. 31 without having to worry about your current certificate of practice meeting any other requirements.

Option B - Choose to Not Renew

Select the "not renewing" option in the online renewal system. If you choose to not renew your certificate of practice you will not be able to practice registered nursing in Manitoba and will be considered a former member. You will not receive the *College eNews* and you will not have voting privileges.

If you choose to return to registered nursing practice you must submit an application for reinstatement and meet all of the requirements for reinstatement to the membership class you select.

For more information on reinstating, please visit our [reinstatement requirements webpage](#).
